

SEK-DOCS

Secure document management

SEKDRIVE IS A WEB-BASED PLATFORM WITH EXTREMELY HIGH CONTROL STANDARDS ON DOCUMENTS AND DATA, TO MANAGE, SHARE AND EXCHANGE CONFIDENTIAL INFORMATION

KEY FEATURES

Document Control and Management

Upload thousands of documents directly from your browser. Detailed access policies for each document and folder

Ease of use

View PDFs, Microsoft Office files, images, and video directly from your browser without any cumbersome plugins or additional downloads

Storage Security

AES256 encryption will ensure that documents will only be viewable through our application

Document Security

Dynamic watermarks on top of any document when it is viewed, printed or downloaded. Customize watermarks with user name, IP address, time and date of document access.

Reporting

View detailed reports of every user/group activity

SOLUTION OVERVIEW

SEK-DOCS provides a secure document management solution, which serves as a central platform for enterprises and outside collaborators to come together and share sensitive information easily and securely, keeping track of every user's actions.

The SEK-DOCS solution proposed by Cloud&Partners applies different security logics at every level, allowing a totally controlled file sharing, managing to avoid also the privacy problems deriving from access data by Sys Admin, Network Admin and PC technicians.

SHARING SCENARIOS

Project Management

Team Management

Due Diligence

Collaboration

Board Communication

Secure document management is an important requirement in large and small businesses.

In each of these situations a high degree of security and traceability of information is required, combined with the possibility of sharing with the outside world.

SEK-DOCS AT A GLANCE

Integrated document viewer

The screenshot displays the Cloud&Partners web application interface. The main area shows a document library for 'Progetto Fusione' with various files like 'Financial', 'Legal', 'Photo', 'Presentazioni', 'Project Description', 'Cashflow Worksheet', 'Financial Model', 'Lorem Ipsum', and 'Profit and loss statement'. An integrated document viewer is overlaid on the right, showing a document with text and a chart titled 'Figure 4.7: Auckland observed and modelled rail patronage trends 1993-2023'. The chart shows a line graph with 'Observed' (black) and 'APT model' (red) data points, along with a '2006 Rail development plan completion' marker. Below the chart are several smaller charts and tables.
